SP FUNDS S&P GLOBAL TECHNOLOGY ETF - FUND SUMMARY

Investment Objective
The SP Funds S&P Global Technology ETF (the “Fund” or the “Global Technology ETF”) seeks to track the performance, before fees and expenses, of the S&P Global 1200 Shariah Information Technology Capped Index (the “Index” or the “Shariah Technology Index”).

Fees and Expenses of the Fund
This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (the “Shares”). You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

<table>
<thead>
<tr>
<th>Annual Fund Operating Expenses (Expenses That You Pay Each Year as a Percentage of The Value of Your Investment)</th>
<th></th>

(1) Because the Fund is new, “Other Expenses” are based on estimated amounts for the current fiscal year.

Expense Example
This Expense Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Expense Example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Expense Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Expense Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<table>
<thead>
<tr>
<th></th>
<th>1 Year</th>
<th>3 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>$56</td>
<td>$176</td>
</tr>
</tbody>
</table>

Portfolio Turnover
The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the Expense Example above, affect the Fund’s performance. Because the Fund is newly offered, portfolio turnover information is not available.

Principal Investment Strategies
The Fund uses a “passive management” (or indexing) approach to track the performance, before fees and expenses, of the Index. The S&P Global 1200 Shariah Information Technology Capped Index is designed to measure the performance of global large-cap equity securities within the information technology sector that pass rules-based screens for adherence to Shariah investment guidelines, with a cap applied to ensure diversification among companies in the Index.

S&P Dow Jones Indices (S&P) is responsible to constructing and maintaining the Index. The Index includes all of the constituents of the S&P Global 1200 Shariah Index classified as part of the GICS® Information Technology Sector. S&P engages a third-party consultant to screen potential constituents for non-compliant business activities (companies that offer products and services that are not compliant with Shariah law such as gambling, alcohol, or tobacco) and to eliminate companies that employ leverage in contravention of Shariah law.

The Index is rebalanced and capped monthly, if necessary, and is weighted based on a modified float adjusted market capitalization of each constituent. If any single constituent exceeds 10% of the Index, the constituent’s weight is capped at 10% and the excess is distributed proportionally to all uncapped constituents. Exposure to a single country of domicile is capped at 50% of the Index, with the excess distributed proportionately to uncapped constituents. As of November 9, 2023, the Index was composed of 99 constituents, representing investments in 16 countries including the United States.

The Fund’s Investment Strategy
The Fund attempts to invest all, or substantially all, of its assets in the component securities that make up the Index. Under normal circumstances, at least 80% of the Fund’s total assets will be invested in the component securities of the Index. The Fund’s investment adviser expects that, over time, the correlation between the Fund’s performance and that of the Index, before fees and expenses, will be 95% or better.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning it generally will invest in all of the component securities of the Index. However, the Fund may use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return, and other characteristics closely resemble the risk, return, and other characteristics of the Index as a whole, when the Fund’s investment adviser believes it is in the best interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index). To the extent the Index includes securities in emerging market securities, the Fund may be invested in equity securities of issuers located in emerging markets countries. The Fund considers emerging markets countries to be those countries included in the Dow Jones Emerging Markets Index.
The Fund generally may invest up to 20% of its total assets in Shariah-compliant securities or other Shariah-compliant investments not included in the Index, but which the Fund’s investment adviser believes will help the Fund track the Index. For example, the Fund may invest in Shariah-compliant securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions, and deletions) or securities such as mutual funds or exchange-traded funds that invest in Shariah-compliant investments. Each investment made by the Fund that is not included in the Index will be screened for compliance with Shariah principles before investment.

To the extent the Index is concentrated in the securities of a particular industry or group of related industries (i.e., more than 25% of its total assets is represented by such securities), the Fund will concentrate its investments to approximately the same extent as the Index. The Index is concentrated in the information technology sector.

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which they appear. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return, and/or ability to meet its investment objective. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Fund—Principal Risks of Investing in the Fund.”

General Market Risk. Securities markets and individual securities may increase or decrease in value. Security prices may fluctuate widely over short or extended periods in response to market or economic news and conditions, and securities markets also tend to move in cycles. If there is a general decline in the securities markets, it is possible your investment may lose value regardless of the individual results of the companies in which the Fund invests. The magnitude of up and down price or market fluctuations over time is sometimes referred to as “volatility,” and it can be significant. In addition, different asset classes and geographic markets may experience periods of significant correlation with each other. As a result of this correlation, the securities and markets in which the Fund invests may experience volatility due to market, economic, political or social events and conditions that may not readily appear to directly relate to such securities, the securities’ issuer or the markets in which they trade.

Equity Securities Risk. Equity securities are subject to changes in value, and their values may be more volatile than those of other asset classes. The Index is composed of common stocks, which generally subject their holders to more risks than preferred stocks and debt securities because common stockholders’ claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of the issuer.

Information Technology Sector Risk. The Fund’s investments will be concentrated in an industry or group of industries to the extent the Index is so concentrated. The Index is concentrated in the information technology sector. Market or economic factors impacting information technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund’s investments. The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of information technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Information technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability.

Shariah-Compliant Investing Risk. Islamic religious law, commonly known as “Shariah,” has certain restrictions regarding finance and commercial activities permitted for Muslims, including interest restrictions and prohibited industries, which reduces the size of the overall universe in which the Fund can invest. The strategy to reduce the investable universe may limit investment opportunities and adversely affect the Fund’s performance, especially in comparison to a more diversified fund. Because Shariah principles preclude the use of interest-paying instruments, cash reserves do not earn income. To the extent that securities become non-compliant following purchase, such securities may be held for a temporary period of time. Additionally, certain companies that meet Shariah screens may nevertheless generate dividend income that is subject to purification.

Foreign Securities Risk. Certain foreign countries may impose exchange control regulations, restrictions on repatriation of profit on investments or of capital invested, local taxes on investments, and restrictions on the ability of issuers of non-U.S. securities to make payments of principal and interest to investors located outside the country, whether from currency blockage or otherwise. In addition, the Fund will be subject to risks associated with adverse political and economic developments in foreign countries, including seizure or nationalization of foreign deposits, the imposition of economic sanctions, different legal systems and laws relating to bankruptcy and creditors’ rights, and the potential inability to enforce legal judgments, all of which could cause the Fund to lose money on its investments in non-U.S. securities. The cost of servicing external debt will also generally be adversely affected by rising international interest rates, as many external debt obligations bear interest at rates which are adjusted based upon international interest rates. Because non-U.S. securities may trade on days when Shares are not priced, NAV may change at times when Shares cannot be sold.

Emerging Markets Risk. Investments in emerging market securities impose risks different from, or greater than, risks of investing in foreign developed countries, including smaller market capitalization; significant price volatility; and restrictions on foreign investment. Emerging market countries may have relatively unstable governments and may present the risk of nationalization of businesses, expropriation, and confiscatory taxation, or, in certain instances, reversion to closed market, centrally planned economies. Emerging market economies may also experience more severe downturns. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and devaluation may occur subsequent to investments in these currencies by the Fund. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries. In addition, less information may be available about companies in emerging markets than in developed markets because such emerging markets companies may not be subject to accounting, auditing and financial reporting standards or to other regulatory practices required by U.S. companies which may lead to potential errors in Index data, Index computation and/or Index construction. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities; adversely affect the trading market and price for such securities; and/or cause the Fund to decline in value.
Currency Risk. Because the Fund’s NAV is determined in U.S. dollars, the Fund’s NAV could decline if the currency of a non-U.S. market in which the Fund invests depreciates against the U.S. dollar or if there are delays or limits on repatriation of such currency. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the Fund’s NAV may change quickly and without warning.

ETF Risk.

- Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk. The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as “Authorized Participants” or “APs” and each an “AP”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

- Cash Redemption Risk. The Fund’s investment strategy may require it to redeem Shares for cash or to otherwise include cash as part of its redemption proceeds. For example, the Fund may not be able to redeem in-kind certain securities held by the Fund. In such a case, the Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used. Additionally, purchases and redemptions of Shares for cash may cause the Fund to incur brokerage costs and that costs could be imposed on the Fund, thus decreasing the Fund’s NAV to the extent that the costs are not offset by a transaction fee payable by an authorized participant.

- Costs of Buying or Selling Shares. Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

- Shares May Trade at Prices Other Than NAV. As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Because securities held by the Fund may trade on foreign exchanges that are closed when the Fund’s primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of ETFs holding only domestic securities.

- Trading. Although Shares are listed on a national securities exchange, such as the NYSE Arca, Inc. (the “Exchange”), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares. Also, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings. These adverse effects on liquidity for Shares, in turn, could lead to wider bid/ask spreads and differences between the market price of Shares and the underlying value of those Shares.

Tracking Error Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times, including during its initial investment period, or may hold securities not included in the Index.

Underlying Index Risk. Neither the Fund’s investment adviser nor the Index Provider (as defined below) is able to guarantee the continuous availability or timeliness of the production of the Index. The calculation and dissemination of the Index values may be delayed if the information technology or other facilities of the Index Provider, calculation agent, data providers and/or relevant stock exchange malfunction for any reason. A significant delay may cause trading in shares of the Fund to be suspended. Errors in Index data, computation and/or the construction in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider, calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

Models and Data Risk. The composition of the Index is heavily dependent on proprietary quantitative models as well as information and data supplied by third parties (“Models and Data”). When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Index universe that would have been excluded or included had the Models and Data been correct and complete. If the composition of the Index reflects such errors, the Fund’s portfolio can be expected to also reflect the errors.

Passive Investment Risk. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to its Index.
Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility due to a number of economic, political and global macro factors including rising inflation, uncertainty regarding central banks’ interest rate increases, the possibility of a national or global recession, trade tensions, political events, the war between Russia and Ukraine and the impact of the coronavirus (COVID-19) global pandemic. The global recovery from COVID-19 may last for an extended period of time. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region.

Large-Capitalization Companies Risk. Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities markets.

Non-diversified Fund risk. The Fund is a non-diversified fund. In general, a non-diversified fund may invest a greater percentage of its assets in a particular issuer and may own fewer securities than other funds. Accordingly, a non-diversified fund is generally subject to the risk that a large loss in an individual security will cause a greater loss for the fund than if the fund was required to hold a larger number of securities or smaller positions.

Recently Organized Fund Risk. The Fund is a recently organized, non-diversified management investment company with a limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Performance

The Fund has not commenced operations and does not have a performance history.

Management

*Investment Adviser:* ShariaPortfolio, Inc. ("ShariaPortfolio" or the "Adviser") serves as investment adviser to the Fund.

*Investment Sub-Adviser:* Tidal Investments LLC ("Tidal Investments" or the "Sub-Adviser") serves as trading sub-adviser to the Fund.

*Portfolio Manager:* Naushad Virji, portfolio manager at ShariaPortfolio, is responsible for the day-to-day portfolio management of the Fund and has been the portfolio manager of the Fund since its inception.

*Sub-Adviser Portfolio Managers:* Michael Venuto, Chief Investment Officer of the Sub-Adviser, and Charles A. Ragauss, CFA, Portfolio Manager for the Sub-Adviser, are responsible for implementing trading decisions for the Fund and have been portfolio managers of the Fund since its inception.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Shares are listed on a national securities exchange, such as the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the “bid” price) and the lowest price a seller is willing to accept for Shares (the “ask” price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the “bid-ask spread.”

Recent information regarding the Fund’s NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund’s website at www.sp-funds.com.

Tax Information

Fund distributions are generally taxable to shareholders as ordinary income, qualified dividend income, or capital gains (or a combination), unless an investment is in a tax-deferred or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
SP FUNDS S&P WORLD ETF - FUND SUMMARY

Investment Objective

The SP Funds S&P World ETF (the “Fund” or the “World ETF”) seeks to track the performance, before fees and expenses, of the S&P DM Ex-U.S. & EM 50/50 Shariah Index (the “Index” or the “Shariah World Index”).

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (the “Shares”). You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

<table>

<tr>
<td><strong>Total Annual Fund Operating Expenses</strong></td>
<td><strong>0.55%</strong></td>
</tr>
</tbody>
</table>

(1) Because the Fund is new, “Other Expenses” are based on estimated amounts for the current fiscal year.

Expense Example

This Expense Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Expense Example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Expense Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Expense Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<table>
<thead>
<tr>
<th>1 Year</th>
<th>3 Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>$56</td>
<td>$176</td>
</tr>
</tbody>
</table>

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the Expense Example above, affect the Fund’s performance. Because the Fund is newly offered, portfolio turnover information is not available.

Principal Investment Strategies

The Fund uses a “passive management” (or indexing) approach to track the performance, before fees and expenses, of the Index. The Shariah World Index is designed to measure the performance of companies located in developed and emerging markets outside of the United States that pass rules-based screens for adherence to Shariah investment guidelines, with a cap applied to ensure diversification among companies in the Index. To the extent the Index includes securities in emerging market securities, the Fund may be invested in equity securities of issuers located in emerging markets countries. The Fund considers emerging markets countries to be those countries included in the Dow Jones Emerging Markets Index.

The Shariah World Index is a blended index, composed of 50% S&P Developed Ex-U.S. LargeMidCap Shariah Index (USD) and 50% S&P Emerging LargeMidCap Shariah Index (USD). S&P engages a third-party consultant to screen potential constituents for non-compliant business activities (companies that offer products and services that are not compliant with Shariah law such as gambling, alcohol, or tobacco) and to eliminate companies that employ leverage in contravention of Shariah law.

The Index is rebalanced monthly, if necessary, and is weighted based on a modified float adjusted market capitalization of each constituent. The Index is comprised of the top 250 constituents of each underlying index, with the constituents of each underlying index representing 50% of the adjusted market capitalization of the Index, with the excess distributed proportionately to uncapped constituents. As of November 9, 2023, the Index was composed of 500 constituents, representing investments in 40 countries excluding the United States.

The Fund’s Investment Strategy

The Fund attempts to invest all, or substantially all, of its assets in the component securities that make up the Index. Under normal circumstances, at least 80% of the Fund’s total assets will be invested in the component securities of the Index. The Fund’s investment adviser expects that, over time, the correlation between the Fund’s performance and that of the Index, before fees and expenses, will be 95% or better.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning it generally will invest in all of the component securities of the Index. However, the Fund may use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return, and other characteristics closely resemble the risk, return, and other characteristics of the Index as a whole, when the Fund’s investment adviser believes it is in the best interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).
The Fund generally may invest up to 20% of its total assets in Shariah-compliant securities or other Shariah-compliant investments not included in the Index, but which the Fund’s investment adviser believes will help the Fund track the Index. For example, the Fund may invest in Shariah-compliant securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions, and deletions) or securities such as mutual funds or exchange-traded funds that invest in Shariah-compliant investments. Each investment made by the Fund that is not included in the Index will be screened for compliance with Shariah principles before investment.

To the extent the Index is concentrated in the securities of a particular industry or group of related industries (i.e., more than 25% of its total assets is represented by such securities), the Fund will concentrate its investments to approximately the same extent as the Index.

**Principal Investment Risks**

The principal risks of investing in the Fund are summarized below. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which they appear. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return, and/or ability to meet its investment objective. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Fund—Principal Risks of Investing in the Fund.”

**General Market Risk.** Securities markets and individual securities may increase or decrease in value. Security prices may fluctuate widely over short or extended periods in response to market or economic news and conditions, and securities markets also tend to move in cycles. If there is a general decline in the securities markets, it is possible your investment may lose value regardless of the individual results of the companies in which the Fund invests. The magnitude of up and down price or market fluctuations over time is sometimes referred to as “volatility,” and it can be significant. In addition, different asset classes and geographic markets may experience periods of significant correlation with each other. As a result of this correlation, the securities and markets in which the Fund invests may experience volatility due to market, economic, political or social events and conditions that may not readily appear to directly relate to such securities, the securities’ issuer or the markets in which they trade.

**Equity Securities Risk.** Equity securities are subject to changes in value, and their values may be more volatile than those of other asset classes. The Index is composed of common stocks, which generally subject their holders to more risks than preferred stocks and debt securities because common stockholders’ claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of the issuer.

**Emerging Markets Risk.** Investments in emerging market securities impose risks different from, or greater than, risks of investing in foreign developed countries, including smaller market capitalization; significant price volatility; and restrictions on foreign investment. Emerging market countries may have relatively unstable governments and may present the risk of nationalization of businesses, expropriation, and confiscatory taxation, or, in certain instances, reversion to closed market, centrally planned economies. Emerging market economies may also experience more severe downturns. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and devaluation may occur subsequent to investments in these currencies by the Fund. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries. In addition, less information may be available about companies in emerging markets than in developed markets because such emerging markets companies may not be subject to accounting, auditing and financial reporting standards or to other regulatory practices required by U.S. companies which may lead to potential errors in Index data, Index computation and/or Index construction. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities; adversely affect the trading market and price for such securities; and/or cause the Fund to decline in value.

**Foreign Securities Risk.** Certain foreign countries may impose exchange control regulations, restrictions on repatriation of profit on investments or of capital invested, local taxes on investments, and restrictions on the ability of issuers of non-U.S. securities to make payments of principal and interest to investors located outside the country, whether from currency blockage or otherwise. In addition, the Fund will be subject to risks associated with adverse political and economic developments in foreign countries, including seizure or nationalization of foreign deposits, the imposition of economic sanctions, different legal systems and laws relating to bankruptcy and creditors’ rights, and the potential inability to enforce legal judgments, all of which could cause the Fund to lose money on its investments in non-U.S. securities. The cost of servicing external debt will also generally be adversely affected by rising international interest rates, as many external debt obligations bear interest at rates which are adjusted based upon international interest rates. Because non-U.S. securities may trade on days when Shares are not priced, NAV may change at times when Shares cannot be sold.

**ETF Risk.**

- **Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.** The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as “Authorized Participants” or “APs” and each an “AP”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

- **Cash Redemption Risk.** The Fund’s investment strategy may require it to redeem Shares for cash or to otherwise include cash as part of its redemption proceeds. For example, the Fund may not be able to redeem in-kind certain securities held by the Fund. In such a case, the Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used. Additionally, purchases and redemptions of Shares for cash may cause the Fund to incur brokerage costs and that costs could be imposed on the Fund, thus decreasing the Fund’s NAV to the extent that the costs are not offset by a transaction fee payable by an authorized participant.
Costs of Buying or Selling Shares. Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

Shares May Trade at Prices Other Than NAV. As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is greater than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Because securities held by the Fund may trade on foreign exchanges that are closed when the Fund’s primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of ETFs holding only domestic securities.

Trading. Although Shares are listed on a national securities exchange, such as the NYSE Arca, Inc. (the “Exchange”), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares. Also, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings. These adverse effects on liquidity for Shares, in turn, could lead to wider bid/ask spreads and differences between the market price of Shares and the underlying value of those Shares.

Tracking Error Risk. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times, including during its initial investment period, or may hold securities not included in the Index.

Underlying Index Risk. Neither the Fund’s investment adviser nor the Index Provider (as defined below) is able to guarantee the continuous availability or timeliness of the production of the Index. The calculation and dissemination of the Index values may be delayed if the information technology or other facilities of the Index Provider, calculation agent, data providers and/or relevant stock exchange malfunction for any reason. A significant delay may cause trading in shares of the Fund to be suspended. Errors in Index data, computation and/or the construction in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider, calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

Models and Data Risk. The composition of the Index is heavily dependent on proprietary quantitative models as well as information and data supplied by third parties (“Models and Data”). When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Index universe that would have been excluded or included had the Models and Data been correct and complete. If the composition of the Index reflects such errors, the Fund’s portfolio can be expected to also reflect the errors.

Passive Investment Risk. The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to its Index.

Currency Risk. Because the Fund’s NAV is determined in U.S. dollars, the Fund’s NAV could decline if the currency of a non-U.S. market in which the Fund invests depreciates against the U.S. dollar or if there are delays or limits on repatriation of such currency. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the Fund’s NAV may change quickly and without warning.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region.

Shariah-Compliant Investing Risk. Islamic religious law, commonly known as “Shariah,” has certain restrictions regarding finance and commercial activities permitted for Muslims, including interest restrictions and prohibited industries, which reduces the size of the overall universe in which the Fund can invest. The strategy to reduce the investable universe may limit investment opportunities and adversely affect the Fund’s performance, especially in comparison to a more diversified fund. Because Shariah principles preclude the use of interest-paying instruments, cash reserves do not earn income. To the extent that securities become non-compliant following purchase, such securities may be held for a temporary period of time. Additionally, certain companies that meet Shariah screens may nevertheless generate dividend income that is subject to purification.

Large-Capitalization Companies Risk. Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities markets.

Non-diversified Fund Risk. The Fund is a non-diversified fund. In general, a non-diversified fund may invest a greater percentage of its assets in a particular issuer and may own fewer securities than other funds. Accordingly, a non-diversified fund is generally subject to the risk that a large loss in an individual security will cause a greater loss for the fund than it would if the fund was required to hold a larger number of securities or smaller positions.
Concentration Risk. The Fund’s investments will be concentrated in an industry or group of industries to the extent the Index is so concentrated. Accordingly, the value of Shares may rise and fall more than the value of shares of funds that invest in securities of companies in a broader range of industries.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility due to a number of economic, political and global macro factors including rising inflation, uncertainty regarding central banks’ interest rate increases, the possibility of a national or global recession, trade tensions, political events, the war between Russia and Ukraine, and the impact of the coronavirus (COVID-19) global pandemic. The global recovery from COVID-19 may last for an extended period of time. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the U.S. and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so.

Recently Organized Fund Risk. The Fund is a recently organized management investment company with a limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Performance

The Fund has not commenced operations and does not have a performance history.

Management

Investment Adviser: ShariaPortfolio, Inc. (“ShariaPortfolio” or the “Adviser”) serves as investment adviser to the Fund.

Investment Sub-Adviser: Tidal Investments LLC (“Tidal Investments” or the “Sub-Adviser”) serves as trading sub-adviser to the Fund.

Portfolio Manager: Naushad Virji, portfolio manager at ShariaPortfolio, is responsible for the day-to-day portfolio management of the Fund and has been the portfolio manager of the Fund since its inception.

Sub-Adviser Portfolio Managers: Michael Venuto, Chief Investment Officer of the Sub-Adviser, and Charles A. Ragauss, CFA, Portfolio Manager for the Sub-Adviser, are responsible for implementing trading decisions for the Fund and have been portfolio managers of the Fund since its inception.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Shares are listed on a national securities exchange, such as the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the “bid” price) and the lowest price a seller is willing to accept for Shares (the “ask” price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the “bid-ask spread.”

Recent information regarding the Fund’s NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund’s website at www.sp-funds.com.

Tax Information

Fund distributions are generally taxable to shareholders as ordinary income, qualified dividend income, or capital gains (or a combination), unless an investment is in a tax-deferred or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
Investment Objective

Each Fund seeks to track the performance, before fees and expenses, of the applicable Index.

The Funds’ investment objectives have not been adopted as fundamental investment policy and therefore a Fund’s investment objective may be changed without the consent of a Fund’s shareholders upon approval by the Board of Trustees (the “Board”) of SP Funds Trust (the “Trust”) and written notice to shareholders.

Principal Investment Strategies

The following information is in addition to, and should be read along with, the description of each Fund’s principal investment strategies in the section titled “Fund Summary—Principal Investment Strategies” above.

To the extent its applicable Index concentrates (i.e., holds more than 25% of its total assets) in the securities of a particular industry or group of related industries, a Fund will concentrate its investments to approximately the same extent as the applicable Index. The Shariah Technology Index is concentrated in the information technology sector.

Each Fund is deemed to be “non-diversified,” which means that it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund.

Principal Risks of Investing in the Funds

The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a “principal risk” of investing in the applicable Fund, regardless of the order in which it appears. Unless otherwise noted, each below risk applies to all Funds. As with any investment, there is a risk that you could lose all or a portion of your investment in a Fund. Some or all of these risks may adversely affect a Fund’s NAV per share, trading price, yield, total return and/or ability to meet its investment objective. The following risks could affect the value of your performance in the Funds. The number of risk factors applicable to a Fund does not necessarily correlate to the overall risk of an investment in that Fund.

Concentration Risk. The Fund’s investments will be concentrated in an industry or group of industries to the extent the Index is so concentrated. In such event, the value of Shares may rise and fall more than the value of shares that invest in securities of companies in a broader range of industries.

Currency Risk. The Fund’s exposure to foreign currencies subjects the Fund to the risk that those currencies will decline in value relative to the U.S. Dollar. Currency rates in foreign countries may fluctuate significantly over short periods of time for any number of reasons, including changes in interest rates and the imposition of currency controls or other political developments in the United States or abroad.

Emerging Markets Risk. The Fund’s investments in emerging market securities impose risks different from, or greater than, risks of investing in foreign developed countries. These risks include smaller market capitalization of securities markets, which may suffer periods of relative illiquidity; significant price volatility; and restrictions on foreign investment. Emerging market countries may have relatively unstable governments and may present the risk of nationalization of businesses, expropriation, and confiscatory taxation or, in certain instances, reversion to closed market, centrally planned economies. Emerging market economies may also experience more severe downturns. In addition, foreign investors may be required to register or pay taxes or tariffs on the proceeds of securities sales; future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization, or creation of government monopolies. The currencies of emerging market countries may experience significant declines against the U.S. dollar, and devaluation may occur subsequent to investments in these currencies by the Fund. Inflation and rapid fluctuations in inflation rates have had, and may continue to have, negative effects on the economies and securities markets of certain emerging market countries.

Additional risks of emerging markets securities may include greater social, economic and political uncertainty and instability; more substantial governmental involvement in the economy; less governmental supervision and regulation; unavailability of currency hedging techniques; companies that are newly organized and small; differences in auditing and financial reporting standards, which may result in unavailability of material information about issuers; and less developed legal systems. Emerging markets securities may have different clearance and settlement procedures, which may be unable to keep pace with the volume of securities transactions or otherwise make it difficult to engage in such transactions. Settlement problems may cause the Fund to miss attractive investment opportunities, hold a portion of its assets in cash pending investment, or be delayed in disposing of a portfolio security. Such a delay could result in possible liability to a purchaser of the security. In addition, less information may be available about companies in emerging markets than in developed markets because such emerging markets companies may not be subject to accounting, auditing and financial reporting standards or to other regulatory practices required by U.S. companies which may lead to potential errors in Index data, Index computation and/or Index construction. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities; adversely affect the trading market and price for such securities; and/or cause the Fund to decline in value.

Equity Securities Risk. The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks, such as those held by the Fund, are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.
ETF Risk.

- Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk. The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

- Cash Redemption Risk. The Fund’s investment strategy may require it to redeem Shares for cash or to otherwise include cash as part of its redemption proceeds. For example, the Fund may not be able to redeem in-kind certain securities held by the Fund. In such a case, the Fund may be required to sell or unwind portfolio investments to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind. As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used. Additionally, purchases and redemptions of Shares for cash may cause the Fund to incur brokerage costs and that costs could be imposed on the Fund, thus decreasing the Fund’s NAV to the extent that the costs are not offset by a transaction fee payable by an authorized participant.

- Costs of Buying or Selling Shares. Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the bid-ask spread. The bid-ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid-ask spreads. Due to the costs of buying or selling Shares, including bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

- Shares May Trade at Prices Other Than NAV. As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of the Shares or during periods of market volatility. This risk is heightened in times of market volatility or periods of steep market declines. The market price of Shares during the trading day, like the price of any exchange-traded security, includes a “bid-ask” spread charged by the exchange specialist, market makers, or other participants that trade the Shares. In times of severe market disruption, the bid-ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares.

- Trading. Although Shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange “circuit breaker” rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares.

Foreign Securities Risk. Certain foreign countries may impose exchange control regulations, restrictions on repatriation of profit on investments or of capital invested, local taxes on investments, and restrictions on the ability of issuers of non-U.S. securities to make payments of principal and interest to investors located outside the country, whether from currency blockage or otherwise. In addition, the Fund will be subject to risks associated with adverse political and economic developments in foreign countries, including seizure or nationalization of foreign deposits, the imposition of economic sanctions, different legal systems and laws relating to bankruptcy and creditors’ rights, and the potential inability to enforce legal judgments, all of which could cause the Fund to lose money on its investments in non-U.S. securities. The cost of servicing external debt will also generally be adversely affected by rising international interest rates, as many external debt obligations bear interest at rates which are adjusted based upon international interest rates. Because non-U.S. securities may trade on days when Shares are not priced, NAV may change at times when Shares cannot be sold.

Foreign banks and securities depositories at which the Fund holds its foreign securities and cash may be recently organized or new to the foreign custody business and may be subject to only limited or no regulatory oversight. Additionally, many foreign governments do not supervise and regulate stock exchanges, brokers and the sale of securities to the same extent as does the United States and may not have laws to protect investors that are comparable to U.S. securities laws. Settlement and clearance procedures in certain foreign markets may result in delays in payment for or delivery of securities not typically associated with settlement and clearance of U.S. investments.

In recent years, the European financial markets have experienced volatility and adverse trends due to concerns about economic downturns in, or rising government debt levels of, several European countries. These events may spread to other countries in Europe, including countries that do not use the Euro. These events may affect the value and liquidity of certain of the Fund’s investments.
General Market Risk. Securities markets and individual securities may increase or decrease in value. Security prices may fluctuate widely over short or extended periods in response to market or economic news and conditions, and securities markets also tend to move in cycles. If there is a general decline in the securities markets, it is possible your investment may lose value regardless of the individual results of the companies in which the Fund invests. The magnitude of up and down price or market fluctuations over time is sometimes referred to as “volatility,” and it can be significant. In addition, different asset classes and geographic markets may experience periods of significant correlation with each other. As a result of this correlation, the securities and markets in which the Fund invests may experience volatility due to market, economic, political or social events and conditions that may not readily appear to directly relate to such securities, the securities’ issuer or the markets in which they trade.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region.

Information Technology Risk (Global Technology ETF only). The Fund invests in companies in the information technology sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. Market or economic factors impacting information technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund’s investments. The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of information technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Information technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability.

Large-Capitalization Investing. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

Models and Data Risk. The composition of the Index is heavily dependent on proprietary quantitative models as well as information and data supplied by third parties (“Models and Data”). When Models and Data prove to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Index universe that would have been excluded or included had the Models and Data been correct and complete. If the composition of the Index reflects such errors, the Fund’s portfolio can be expected to also reflect the errors.

Non-Diversification Risk. The Fund is considered to be “non-diversified,” which means that it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a smaller number of issuers could cause the Fund’s overall value to decline to a greater degree than if the Fund held a more diversified portfolio. This may increase the Fund’s volatility and have a greater impact on the Fund’s performance.

Passive Investment Risk. The Fund invests in the securities included in, or representative of, its Index regardless of its investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to its Index.

Recent Market Events Risk. U.S. and international markets have experienced significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including the impact of COVID-19 as a global pandemic and related public health crisis, growth concerns in the United States and overseas, uncertainties regarding interest rates, rising inflation, trade tensions, and the threat of tariffs imposed by the United States and other countries. In particular, the global spread of COVID-19 has resulted in disruptions to business operations and supply chains, stress on the global healthcare system, growth concerns in the United States and overseas, staffing shortages and the inability to meet consumer demand, and widespread concern and uncertainty. The global recovery from COVID-19 is proceeding at slower than expected rates due to the emergence of variant strains and may last for an extended period of time. Health crises and related political, social and economic disruptions caused by the spread of COVID-19 may also exacerbate other pre-existing political, social and economic risks in certain countries. As a result of continuing political tensions and armed conflicts, including the war between Ukraine and Russia, the United States and the European Union imposed sanctions on certain Russian individuals and companies, including certain financial institutions, and have limited certain exports and imports to and from Russia. The war has contributed to recent market volatility and may continue to do so. These developments, as well as other events, could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, despite government efforts to address market disruptions. As a result, the risk environment remains elevated. The Adviser will monitor developments and seek to manage the Fund in a manner consistent with achieving the Fund’s investment objective, but there can be no assurance that they will be successful in doing so.

Recently Organized Fund Risk. The Fund is a recently organized management investment company with a limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decision. There can be no assurance that the Fund will grow to or maintain an economically viable size.

Shariah-Compliant Investing Risk. Islamic religious law, commonly known as “Shariah,” has certain restrictions regarding finance and commercial activities permitted for Muslims, including interest restrictions and prohibited industries, which reduces the size of the overall universe in which the Fund can invest. The strategy to reduce the investable universe may limit investment opportunities and adversely affect the Fund’s performance, especially in comparison to a more diversified fund. Because Shariah principles preclude the use of interest-paying instruments, cash reserves do not earn income. To the extent that securities become non-compliant following purchase, such securities may be held for a temporary period of time. Additionally, certain companies that meet Shariah screens may nevertheless generate dividend income that is subject to purification.
Tracking Error Risk. As with all Index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index. The use of sampling techniques may affect the Fund’s ability to achieve close correlation with its Index. The Fund may use a representative sampling strategy to achieve its investment objective, if the Adviser believes it is in the best interests of the Fund, which generally can be expected to produce a greater non-correlation risk.

Underlying Index Risk. Neither the Adviser nor the Index Provider is able to guarantee the continuous availability or timeliness of the production of the Index. The calculation and dissemination of Index values may be delayed if the information technology or other facilities of the Index Provider, calculation agent, data providers and/or relevant stock exchange malfunction for any reason. A significant delay may cause trading in shares of the Fund to be suspended. Errors in Index data, computation and/or the construction in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider, calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

Non-Principal Risks of Investing in the Funds.

Tax Risk. To qualify for the favorable tax treatment generally available to a regulated investment company (“RIC”), the Fund must satisfy certain diversification requirements. In particular, the Fund generally may not acquire a security if, as a result of the acquisition, (i) more than 50% of the value of the Fund’s assets would be invested in (a) issuers in which the Fund has, in each case, invested more than 5% of the Fund’s assets or (b) issuers more than 10% of whose outstanding voting securities are owned by the Fund or (ii) more than 25% of the value of the Fund’s assets would be invested in (a) the securities of any one issuer. Given the concentration of the Index in a relatively small number of securities, it may not always be possible for the Fund to fully implement a replication strategy or a representative sampling strategy while satisfying these diversification requirements. The Fund’s efforts to satisfy the diversification requirements may affect the Fund’s execution of its investment strategy and may cause the Fund’s return to deviate from that of the Index, and the Fund’s efforts to replicate or represent the Index may cause it inadvertently to fail to satisfy the diversification requirements. If the Fund were to fail to satisfy the diversification requirements, it could incur penalty taxes and be forced to dispose of certain assets, or it could fail to qualify as a RIC. If the Fund were to fail to qualify as a RIC, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income.

ADDITIONAL INFORMATION ABOUT EACH INDEX

Each Index is a product of S&P Dow Jones Indices LLC (the “Index Provider”), which is independent of each Fund and Adviser. The Index Provider determines the composition and relative weightings of the securities in each Index and publishes information regarding the market value of each Index.

The Index Provider has contracted with Ratings Intelligence Partners (RI) to provide the Shariah screens and filter the stocks based on these screens. RI is a London/Kuwait-based consulting company specializing in solutions for the global Islamic investment market. Its team consists of qualified Islamic researchers who work directly with a Shariah Supervisory Board, which is a board of Islamic scholars serving to interpret business issues and recommend actions related to business decisions for the indices.

Shariah Compliance

Islamic religious law, commonly known as “Shariah,” has certain restrictions regarding finance and commercial activities permitted for Muslims, including interest restrictions and prohibited industries. Each Fund may utilize a liquidation period of up to 90 days to exit its position in holdings that are deemed to be non-Shariah compliant. This liquidation period may only be utilized to minimize liquidation costs.

To be Shariah compliant, companies and investments must pass several screens for permissible asset classes and business activities. Stocks and Islamic ETFs are eligible for Shariah compliance consideration but preferred shares and interest-paying securities are not. A business activities screen excludes companies that derive more than five percent of their total income from non-compliant income sources. Non-compliant income sources include alcohol; gambling; weapons; tobacco; adult entertainment; pork products; music, cinema and broadcasting; highly-leveraged businesses; and interest-based businesses.

Dividend Purification

If a company derives a portion of its total income from interest income and/or Shariah-prohibited business activities, Shariah investment principles state that this portion must be “purified” from the distributions paid out to shareholders. Shareholders may purify their portion of prohibited income received by absolving an equivalent amount to charitable purposes. Accordingly, for investors seeking to purify prohibited income received from a Fund, if any, ShariaPortfolio will publish an income purification calculator on the Fund’s website, www.sp-funds.com, to Fund investors in calculating the per share amount to be purified on a monthly basis.

ShariaPortfolio, in conjunction with the Shariah Advisor (defined below), determines such amount by evaluating income earned from Shariah-prohibited business activities. In making such determination, ShariaPortfolio and the Shariah Advisor consider the amount of prohibited income in relation to the number of shares of the company held by a Fund and a Fund’s holding period of such shares. A company may have prohibited income whether or not the company’s profits have been distributed and whether or not the company has declared a profit or suffered a loss.

Such information will generally be posted prior to a Fund’s scheduled distribution of any dividend income to shareholders. For additional information about each Fund’s distribution policies, see “Dividends, Distributions, and Taxes” below in this Prospectus.
PORTFOLIO HOLDINGS INFORMATION

Information about each Fund’s daily portfolio holdings is available on the Funds’ website at www.sp-funds.com. A complete description of the Funds’ policies and procedures with respect to the disclosure of a Fund's portfolio holdings is available in the Funds’ Statement of Additional Information (“SAI”).

MANAGEMENT

Investment Adviser

ShariaPortfolio, Inc, 1331 S. International Pkwy, Suite 2291, Lake Mary, Florida 32746, serves as the investment adviser to the Funds pursuant to an advisory agreement between ShariaPortfolio and the Trust (the “Advisory Agreement”) and is responsible for the day-to-day management of the Funds. In addition to the Funds, the Adviser serves as the investment sub-adviser for three ETFs, a private fund and separately managed accounts. The Adviser is an investment adviser registered with the SEC under the Investment Advisers Act of 1940, as amended. For its services, ShariaPortfolio is paid a unitary fee by each Fund, which fee is calculated daily and paid monthly, at an annual rate of .55% of each Fund’s average daily net assets. As of October 31, 2023, ShariaPortfolio had assets under management of approximately $628 million.

A discussion regarding the basis for the Board’s approval of the Funds’ Advisory Agreement will be available in the Funds’ first report to shareholders.

Under the Advisory Agreement, in exchange for a single unitary management fee from each Fund, the Adviser has agreed to pay all expenses incurred by a Fund except for interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution fees and expenses paid by a Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act (collectively, the “Excluded Expenses”).

Investment Sub-Adviser

Tidal Investments LLC, a Tidal Financial Group company, located at 234 West Florida Street, Milwaukee, Wisconsin 53204, is an SEC-registered investment adviser and a Delaware limited liability company. Tidal Investments was founded in and has been managing investment companies since March 2012. As of February 28, 2023, Tidal Investments had assets under management of approximately $6.0 billion.

Portfolio Managers

Naushad Virji, Portfolio Manager for the Adviser

Naushad Virji, launched ShariaPortfolio in 2014 and ShariaPortfolio Canada, Inc. in 2019 and currently serves as Chairman of the Board of ShariaPortfolio. He has also been Chief Executive Officer at Virji Investments, Inc., a registered investment advisor firm, since 2003. Mr. Virji attended the University of Florida where he received a degree in business administration.

Michael Venuto, Chief Investment Officer for the Sub-Adviser

Mr. Venuto is a co-founder and has been the Chief Investment Officer of the Sub-Adviser since 2012. Mr. Venuto is an ETF industry veteran with over a decade of experience in the design and implementation of ETF-based investment strategies. Previously, he was Head of Investments at Global X Funds where he provided portfolio optimization services to institutional clients. Before that, he was Senior Vice President at Horizon Kinetics where his responsibilities included new business development, investment strategy and client and strategic initiatives.

Charles A. Ragauss, CFA, Portfolio Manager for the Sub-Adviser

Mr. Ragauss serves as Portfolio Manager of the Sub-Adviser, having joined the Sub-Adviser in September 2020. Mr. Ragauss previously served as Chief Operating Officer and in other roles at CSat Investment Advisory, L.P. from April 2016 to September 2020. Previously, Mr. Ragauss was Assistant Vice President at Huntington National Bank (“Huntington”), where he was Product Manager for the Huntington Funds and Huntington Strategy Shares ETFs. Mr. Ragauss attended Grand Valley State University where he received his Bachelor of Business Administration in Finance and International Business, as well as a minor in French. He is a member of both the National and West Michigan CFA societies and holds the CFA designation.

CFA® is a registered trademark owned by the CFA Institute.

The Funds’ SAI provides additional information about the Portfolio Managers’ compensation structure, other accounts that the Portfolio Managers manage, and the Portfolio Managers’ ownership of Shares.

Shariah Auditor

Raqaqa LLC has been appointed as the Shariah auditor (the “Shariah Auditor”) to advise ShariaPortfolio with regard to its interpretation of and compliance with Shariah principles. The Shariah Auditor specializes in providing Shariah compliance services to the financial services sector and provides its services in accordance with the collective decisions of Islamic jurisprudence, Islamic financial standards of Accounting and Auditing Organization for Islamic Financial Institutions (AAOIFI) and the Islamic Financial Services Board (IFSB), international financial reporting standards, and local regulatory frameworks.

The Shariah Auditor performs annual Shariah audits to assess the Shariah compliance of each Fund. The Shariah Auditor does not make investment decisions, provide investment advice, or otherwise act in the capacity of an investment adviser to the Funds. Additionally, the Shariah Auditor is not involved in the maintenance of any of the Indices and does not otherwise act in the capacity of an Index Provider.

FUND SPONSOR

The Adviser has entered into an agreement with SP Funds Management, LLC (the “Fund Sponsor”), under which the Fund Sponsor assumes the obligation of the Adviser to pay all expenses of the Funds, except Excluded Expenses (such expenses of each Fund, except Excluded Expenses, the “Unitary Expenses”). The Fund Sponsor is controlled by, and is therefore an affiliated entity of, ShariaPortfolio. Although the Fund Sponsor has agreed to be responsible for the Unitary Expenses, the Adviser retains the ultimate obligation to the Funds to pay such expenses. For assuming the payment obligations, the Adviser has agreed to pay to the Fund Sponsor the profits, if
any, generated by the Funds’ unitary management fee. The Fund Sponsor does not make investment decisions, provide investment advice, participate in the management of the Funds, or otherwise act in the capacity of an investment adviser to the Funds. The Fund Sponsor is not involved in the maintenance of the Indices and does not act in the capacity of an Index Provider.

HOW TO BUY AND SELL SHARES

Each Fund issues and redeems Shares only in Creation Units at the NAV per share next determined after receipt of an order from an AP. Only APs may acquire Shares directly from a Fund, and only APs may tender their Shares for redemption directly to a Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a participant agreement that has been agreed to by the Distributor (defined below), and that has been accepted by the Funds’ transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.
Most investors buy and sell Shares in secondary market transactions through brokers. Individual Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

**Book Entry**

Shares are held in book-entry form, which means that no stock certificates are issued. Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC’s participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book-entry or “street name” through your brokerage account.

**Frequent Purchases and Redemptions of Shares**

The Funds imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Funds, are an essential part of the ETF process and help keep Share trading prices in line with the NAV. As such, the Funds accommodate frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Funds employ fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Funds in effecting trades. In addition, the Funds and the Adviser reserve the right to reject any purchase order at any time.

**Determination of Net Asset Value**

Each Fund’s NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange (“NYSE”), generally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The NAV for each Fund is calculated by dividing the Fund’s net assets by its Shares outstanding.

In calculating its NAV, each Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. The values of non-U.S. dollar denominated securities are converted to U.S. dollars using foreign currency exchange rates generally determined as of 4:00 p.m. London time. If such information is not available for a security held by a Fund or is determined to be unreliable, the security will be valued at fair value estimates under guidelines established by the Trust and the Adviser (as described below).

**Fair Value Pricing**

Consistent with Rule 2a-5 under the 1940 Act, the Trust and the Adviser have adopted procedures and methodologies wherein the Adviser, serving as the Funds’ Valuation Designee (as defined in Rule 2a-5), determines the fair value of Fund investments whose market prices are not “readily available” or are deemed to be unreliable. For example, such circumstances may arise when (i) an investment has been delisted or has had its trading halted or suspended; (ii) an investment’s primary pricing source is unable or unwilling to provide a price; (iii) an investment’s primary trading market is closed during regular market hours; or (iv) an investment’s value is materially affected by events occurring after the close of the investment’s primary trading market. Generally, when fair valuing an investment, the Valuation Designee will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer’s business, recent trades or offers of the investment, general and/or specific market conditions, and the specific facts giving rise to the need to fair value the investment. Fair value determinations are made in good faith and in accordance with the Adviser’s fair value methodologies, subject to oversight by the Board. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser will be able to obtain the fair value assigned to the investment upon the sale of such investment.

**Investments by Other Registered Investment Companies in the Funds**

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, including Shares. Registered investment companies are permitted to invest in the Funds beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust or rule under the 1940 Act, including that such investment companies enter into an agreement with the Funds.

**Delivery of Shareholder Documents – Householding**

Householding is an option available to certain investors of the Funds. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Funds is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.
DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

Each Fund will generally declare and distribute net investment income, if any, at least monthly, and any net realized capital gains to its shareholders at least annually.

Each Fund will declare and pay income and capital gain distributions, if any, in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Funds. Your investment in a Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

Each Fund intends to qualify each year for treatment as a RIC under the Internal Revenue Code (the “Code”). If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, a Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred or other tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when a Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (institutional investors only).

The following general discussion of certain U.S. federal income tax consequences is based on provisions of the Code and the regulations issued thereunder as in effect on the date of this Prospectus. New legislation, as well as administrative changes or court decisions, may significantly change the conclusions expressed herein, and may have a retroactive effect with respect to the transactions contemplated herein.

Taxes on Distributions

For federal income tax purposes, distributions of net investment income are generally taxable to shareholders as ordinary income or qualified dividend income. Taxes on distributions of net capital gains (if any) are determined by how long a Fund owned the investments that generated them, rather than how long a shareholder has owned their Shares. Sales of assets held by a Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by such Fund for one year or less generally result in short-term capital gains and losses. Distributions of a Fund’s net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by such Fund as capital gain dividends (“Capital Gain Dividends”) will be taxable as long-term capital gains to shareholders. Distributions of short-term capital gain will generally be taxable to shareholders as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by a Fund as “qualified dividend income” are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided certain holding period and other requirements are met. “Qualified dividend income” generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that a Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from a Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from a Fund.

In addition to the federal income tax, certain individuals, trusts, and estates may be subject to a net investment income (“NII”) tax of 3.8%. The NII tax is imposed on the lesser of (i) a taxpayer’s investment income, net of deductions properly allocable to such income; or (ii) the amount by which such taxpayer’s modified adjusted gross income exceeds certain thresholds ($250,000 for married individuals filing jointly, $200,000 for unmarried individuals and $125,000 for married individuals filing separately). Each Fund’s distributions are includable in a shareholder’s investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon a sale or redemption of Fund shares is includable in such shareholder’s investment income for purposes of this NII tax.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by a Fund before your investment (and thus were included in the Shares’ NAV when you purchased your Shares).

You may wish to avoid investing in a Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable to you even though it may economically represent a return of a portion of your investment.
If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by a Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. A Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Under the Foreign Account Tax Compliance Act (“FATCA”), a Fund may be required to withhold a generally nonrefundable 30% tax on (i) distributions of investment company taxable income and (ii) distributions of net capital gain and the gross proceeds of a sale or redemption of Fund shares paid to (A) certain “foreign financial institutions” unless such foreign financial institution agrees to verify, monitor, and report to the IRS the identity of certain of its account-holders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement between the United States and the foreign financial institution’s country of residence), and (B) certain “non-financial foreign entities” unless such entity certifies to the Fund that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. In December 2018, the IRS and Treasury Department released proposed Treasury Regulations that would eliminate FATCA withholding on Fund distributions of net capital gain and the gross proceeds from a sale or redemption of Fund shares. Although taxpayers are entitled to rely on these proposed Treasury Regulations until final Treasury Regulations are issued, these proposed Treasury Regulations have not been finalized, may not be finalized in their proposed form, and are potentially subject to change. This FATCA withholding tax could also affect a Fund’s return on its investments in foreign securities or affect a shareholder’s return if the shareholder holds Shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in a Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

Each Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that they are not subject to such withholding.

**Taxes When Shares Are Sold on the Exchange**

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of capital gain dividends paid with respect to such Shares. Any loss realized on a sale will be disallowed to the extent Shares of a Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of substantially identical Shares.

**Taxes on Purchases and Redemptions of Creation Units**

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP’s aggregate basis in the securities delivered plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP’s basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The IRS may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing “wash sales” (for an AP who does not mark-to-market their holdings) or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year and as a short-term capital gain or loss if such Shares have been held for one year or less.

A Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. A Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause a Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, a Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

**Foreign Investments**

Interest and other income received by a Fund with respect to foreign securities may give rise to withholding and other taxes imposed by foreign countries. Tax treaties or conventions between certain countries and the United States may reduce or eliminate such taxes. If as of the close of a taxable year more than 50% of the value of a Fund’s assets consists of certain foreign stock or securities, the Fund will be eligible to elect to “pass through” to investors the amount of foreign income and similar taxes paid by such Fund during that taxable year. This means that investors would be considered to have received as additional income their respective shares of such foreign taxes, but may be entitled to either a corresponding tax deduction in calculating taxable income, or, subject to certain limitations, a credit in calculating federal income tax. If a Fund does not so elect, the Fund will be entitled to claim a deduction for certain foreign taxes incurred by such Fund. A Fund (or its administrative agent) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.
The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in each Fund. It is not a substitute for personal tax advice. You also may be subject to foreign, state and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Taxes" in the SAI.

**DISTRIBUTION**

Foreside Fund Services, LLC (the “Distributor”), the Funds’ distributor, is a broker-dealer registered with the SEC. The Distributor distributes Creation Units for the Funds on an agency basis and does not maintain a secondary market in Shares. The Distributor has no role in determining the policies of the Funds or the securities that are purchased or sold by the Funds. The Distributor’s principal address is Three Canal Plaza, Suite 100, Portland ME 04101.

The Board has adopted a Distribution (Rule 12b-1) Plan (the “Plan”) pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, each Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year to pay distribution fees for the sale and distribution of its Shares.

No Rule 12b-1 fees are currently paid by the Funds, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

**PREMIUM/DISCOUNT INFORMATION**

Information regarding how often Shares of a Fund trade on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the applicable Fund can be found on the Fund’s website at www.sp-funds.com when available.

**Summary of Certain Provisions of Governing Documents**

The Declaration of Trust requires a shareholder to follow certain procedures in order to bring a derivative action on behalf of the Trust including (i) the shareholder must make a pre-suit demand upon the Board of Trustees unless such effort is not likely to succeed, (ii) holder of at least 10% of outstanding shares must join the action; and (iii) the Board must be allowed a reasonable time to consider the request and investigate the claim. Shareholders may be required to undertake to reimburse the Trust for its costs of investigation if the suit does not proceed. Pursuant to the Declaration of Trust, shareholders agree to bring any claim that affects all shareholders equally as a derivative suit irrespective of whether the alleged actions may give rise to a direct claim. These provisions do not apply to claims brought the federal securities laws.

The Declaration of Trust provides that any suit or claim brought by a shareholder must be brought exclusively in the jurisdictions of New York or Delaware, depending on the nature of the claim. Such provisions mean that shareholders may have to bring suit in an inconvenient or less favorable jurisdiction. There is a question as to the enforceability of the exclusive jurisdiction provisions with to claims arising under the Securities Act of 1933 and 1940 Act. The Declaration of Trust also provides that shareholder waive the right to a jury trial.

**ADDITIONAL NOTICES**

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Shares in connection with the administration, marketing, or trading of Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser and each Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Funds particularly.

Delaware law permits the governing documents of a statutory trust to expand, restrict or eliminate the fiduciary duties that trustees, shareholders or other persons might otherwise be subject to, and replace them with the standards set forth in the Trust’s governing documents.

The Trust’s Declaration of Trust provides that the Trustees shall not be subject to fiduciary duties except as set forth in the Declaration of Trust. The foregoing relates specifically to Delaware laws. Nothing in the Declaration of Trust modifying, restricting or eliminating the duties or liabilities of trustees shall apply to, or in any way limit, the duties (including state law fiduciary duties of loyalty and care) or liabilities of such persons with respect to matters arising under the federal securities laws.

Each Index is a product of S&P Dow Jones Indices LLC, a division of S&P Global, or its affiliates (“SPDJI”), and has been licensed for use by the Adviser. Standard & Poor’s®, S&P®, and S&P 500® are registered trademarks of Standard & Poor’s Financial Services LLC (“S&P”); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC (“Dow Jones”); and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by the Adviser. It is not possible to invest directly in an index. The Funds are not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, any of their respective affiliates (collectively, “S&P Dow Jones Indices”). S&P Dow Jones Indices makes no representation or warranty, express or implied, to the owners of the Funds or any member of the public regarding the advisability of investing in securities generally or in the Funds particularly. Past performance of an index is not an indication or guarantee of future results. S&P Dow Jones Indices’ only relationship to the Adviser with respect to each Index is the licensing of the Index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices and/or its licensors. Each Index is determined, composed and calculated by S&P Dow Jones Indices without regard to the Adviser or the Fund. S&P Dow Jones Indices has no obligation to take the needs of the Adviser or the owners of the Fund into consideration in determining, composing or calculating each Index. S&P Dow Jones Indices is not responsible for and has not participated in the determination of the prices, and amount of shares of the Funds or the timing of the issuance or sale of shares of the Funds or in the determination or calculation of the equation by which shares of the Funds are to be converted into cash, surrendered or redeemed, as the case may be. S&P Dow Jones Indices has no obligation or liability in connection with the administration, marketing or trading of shares of the Funds. There is no assurance that investment products based on each Index will accurately track Index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment or tax advisor. A tax advisor should be consulted to evaluate the impact of any tax-exempt securities on portfolios and the tax consequences of making any particular investment decision. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice.
S&P DOW JONES INDICES DOES NOT GUARANTEE THE ADEQUACY, ACCURACY, TIMELINESS AND/OR THE COMPLETENESS OF EACH INDEX OR ANY DATA RELATED THERETO OR ANY COMMUNICATION, INCLUDING, BUT NOT LIMITED TO, ORAL OR WRITTEN COMMUNICATION (INCLUDING ELECTRONIC COMMUNICATIONS) WITH RESPECT THERETO. S&P DOW JONES INDICES SHALL NOT BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS THEREIN. S&P DOW JONES INDICES MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR AS TO RESULTS TO BE OBTAINED BY THE ADVISER, OWNERS OF THE FUNDS, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF EACH INDEX OR WITH RESPECT TO ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL S&P DOW JONES INDICES BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE. THERE ARE NO THIRD PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND THE ADVISER, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.
Investors may find more information about the Funds in the following documents:

**Statement of Additional Information.** The Funds’ SAI provides additional details about the investments of the Funds and certain other additional information. A current SAI dated November 20, 2023, as supplemented from time to time, is on file with the SEC and is herein incorporated by reference into this Prospectus. It is legally considered a part of this Prospectus.

**Annual/Semi-Annual Reports.** Additional information about the Funds’ investments will be available in the Funds’ annual and semi-annual reports to shareholders. In the annual report you will find a discussion of the market conditions and investment strategies that significantly affected the Funds’ performance during the prior fiscal year.

You can obtain free copies of these documents, request other information or make general inquiries about the Funds by contacting the Funds at ShariaPortfolio, Inc., 1331 S. International Pkwy Ste 2291, Lake Mary, FL 32746 or calling 425-409-9500.

Shareholder reports and other information about the Funds are also available:

- Free of charge from the SEC’s EDGAR database on the SEC’s website at http://www.sec.gov; or
- Free of charge from the Funds’ Internet website at www.sp-funds.com; or
